

## BridgeGate Version 11.0.1-251202

### Release Notes

We are pleased to announce the release of BridgeGate Version 11.0.1-251202. See below for a list of Enhancements and Bug Fixes.

### NOTES associated with Enhancements/Bug fixes

**DARK\_BOLD\_RED = IMPORTANT**

**BOLD\_LIGHT\_GREY = INFORMATIONAL**

**LIGHT\_RED = SITUATIONAL**

Note #	Description
Note: 1	Any BridgeGate environment needs to be on build 10.0.53-250714 or later before upgrading to BridgeGate 11.x
Note: 2	BridgeGate 11.0.0 has moved all third party libraries from the /server/webapps/ROOT.war to an external collection of libraries located at /ext/lib. These external third party libraries are in a zip file hosted on the bridgegatedev server. <a href="https://www.bridgegatedev.com/software/previous/BridgeGate_11.0/external/">https://www.bridgegatedev.com/software/previous/BridgeGate_11.0/external/</a> . The latest version will be automatically downloaded and installed during a normal service pack installation via the BridgeGate™ portal Software Updates page. NOTE: If a manual service pack installation is performed the user must determine if the service pack requires a newer version of external libraries, from what is currently installed on the server, and manually download the external libraries into the /servicpack directory. Then remove all existing files from the /ext/lib directory and finally unzip the external jars zip into the /ext/lib directory before restarting BridgeGate™.
Note: 3	BridgeGate 11.0.0 uses JSON structured templates. During BridgeGate™ server or SWT workbench start-up any pre-existing XML based templates will be backed up to folder accounts_xml_bk and migrated to JSON.
Note: 4	BridgeGate 11.0.0 adds a web based workbench in the portal, all functionality from the SWT workbench has been replicated in the web based version. NOTE: The SWT workbench will continue to be supported.

1. Platform Component Library Versions

- Upgrade of FTP/SSH/SFTP
- Upgrade BGWorkbench Installer
- Java openjdk 21.0.1+12-29
- MySQL 8.0.33
