

BridgeGate Version 11.0.5-260309

Release Notes

We are pleased to announce the release of BridgeGate Version 11.0.5-260309. See below for a list of Enhancements and Bug Fixes.

NOTES associated with Enhancements/Bug fixes

DARK_BOLD_RED = IMPORTANT

BOLD_LIGHT_GREY = INFORMATIONAL

LIGHT_RED = SITUATIONAL

Note #	Description
Note: 1	Any BridgeGate environment needs to be on build 10.0.53-250714 or later before upgrading to BridgeGate 11.x
Note: 2	BridgeGate 11.0.0 has moved all third party libraries from the /server/webapps/ROOT.war to an external collection of libraries located at /ext/lib. These external third party libraries are in a zip file hosted on the bridgegatedev server. https://www.bridgegatedev.com/software/previous/BridgeGate_11.0/external/ . The latest version will be automatically downloaded and installed during a normal service pack installation via the BridgeGate™ portal Software Updates page. NOTE: If a manual service pack installation is performed the user must determine if the service pack requires a newer version of external libraries, from what is currently installed on the server, and manually download the external libraries into the /servicpack directory. Then remove all existing files from the /ext/lib directory and finally unzip the external jars zip into the /ext/lib directory before restarting BridgeGate™.
Note: 3	BridgeGate 11.0.0 uses JSON structured templates. During BridgeGate™ server or SWT workbench start-up any pre-existing XML based templates will be backed up to folder accounts_xml_bk and migrated to JSON.
Note: 4	BridgeGate 11.0.0 adds a web based workbench in the portal, all functionality from the SWT workbench has been replicated in the web based version. NOTE: The SWT workbench will continue to be supported.

1. Platform Component Library Versions

- Upgrade of FTP/SSH/SFTP
- Upgrade BGWorkbench Installer
- Java openjdk 25.0.2
- MySQL 8.0.33
- MySQL Connector 9.5.0
- Apache Tomcat/9.0.115
